

Organic brown seaweed capsules from ascocell™: the best of Icelandic seaweed as a dietary supplement

Natural minerals, vitamins and trace elements – 100% vegan and organic

Organic brown seaweed capsules from ascocell™ offer the best of Icelandic brown seaweed from the cleanest waters in the world to boost skin, body and wellbeing. As a sustainably produced, vegan dietary supplement, the capsules help set you naturally on the way to physical wellbeing. How? Seaweed from the Westfjords of Iceland absorbs and stores large amounts of minerals and trace elements during its slow, natural growth process. Scientific data shows that this seaweed contains well over 80 different health-promoting elements. A kilo of seaweed boasts the same active substances as 10,000 liters of seawater.

ascocell™ capsules contain powdered seaweed and support a well-balanced diet. Key trace elements, vitamins and amino acids in the seaweed are preserved by the gentle treatment process and help to improve physical wellbeing. Brown seaweed is also a natural source of iodine. This makes organic brown seaweed capsules an alternative to fish and seafood, and thus well-suited to vegetarians and vegans. The capsules are flavorless and easy to digest.

Organic brown seaweed capsules naturally bring the sea's vital substances to your body

The capsules are made entirely from natural brown seaweed, are naturally free of gluten and lactose, and do not contain other allergens. There are no fillers, colorings or preservatives, and they are made without using any genetic engineering – a positive alternative for anyone who considers a healthy, environmentally friendly diet to be important.

A focus on nature and sustainability – careful storage in environmentally friendly containers

ascocell™ organic brown seaweed capsules are made of plant-based cellulose and are easy to digest. Each packaging unit contains 120 capsules in a MIRON violet glass jar. This means that the capsules are protected from degradation as a result of exposure to light, and will keep for a long time. The containers can be reused, for example to store herbs and spices in light-protected conditions.

The capsules are made to the highest standards for foodstuffs and hold organic certification (DE-ÖKO-007). Seaweed cultivation and harvesting are also strictly controlled, ensuring sustainability and high quality levels. Ascocell™ seaweed is carefully harvested from the Icelandic fjords using special machinery with paddle wheels. The top of the seaweed can only be trimmed above its regeneration zone every four years. The seaweed is washed in natural geothermal sources, gently dried using geothermal energy, and then carefully ground. Once opened up, our brown seaweed is ready to give you all of the energy it has to offer.

About seacell cosmetics: *seacell cosmetics markets the certified and tested skincare and natural cosmetics brands seacell® and ascocell™. The key essence used in the products is Icelandic brown seaweed. This seaweed is then supplemented with Dead Sea salt to create the ascocell™ product series. seacell® CELTIC LINE, presented for the first time at the trade fair, is based on the CELTIC formula developed to an old Celtic recipe. This ensures that the seaweed's full bioactive effect is preserved. seacell cosmetics is a family company and has been working with seaweed for 15 years, using the perfect conditions in the Westfjords of Iceland to produce natural products for people with both normal and damaged skin. We also offer dietary supplements. Our company's motto is fairness, sustainability and comfortable skin for our customers! Further information about our products is available at www.seacell-cosmetics.com.*
